

Vector EHS Management

Powering Safer, Compliant, and More Efficient Operations

Unify your organization's safety, compliance, and reporting functions into a single connected platform. Vector EHS provides safety leaders with real-time insights into performance, automates compliance processes, and transforms data into prevention, so your teams can focus on keeping people safe and operations running smoothly.

Incidents & Claims Management

- Investigate and analyze every type of workplace incident, including injuries, illnesses, near misses, vehicle accidents, environmental events, and property damage.
- Auto-generate OSHA 301, 300, and 300A forms for fast, accurate recordkeeping.
- Drill into root causes and trends to implement corrective actions that prevent recurrence and reduce costs.

Inspections & Observations

- Create or customize pre-built checklists to evaluate compliance with essential regulatory standards.
- Automate inspection scheduling and assign corrective actions, while using real-time alerts and reminders to promote accountability.

Dashboards, Metrics, & Reporting

- Save time and effort with tracking capabilities of over 100 pre-built leading and lagging indicators.
- Monitor the most relevant data for your EHS objectives using customizable KPIs and personalized dashboards.
- Keep key stakeholders updated on safety activities throughout your organization using automated, customized reports that are distributed according to your schedule.

Risk Management

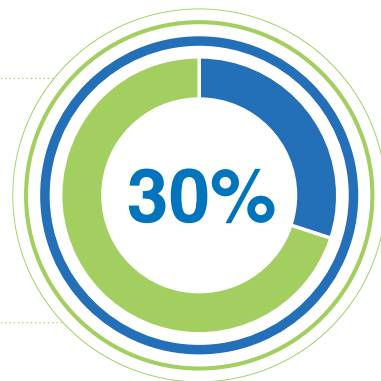

- Shift from reactive to proactive risk control with the ability to record, assess, and resolve hazards and safety concerns before they impact operations.
- Perform job safety analyses and assess residual risk to uncover hidden threats early, preventing disruptions to operations or safety performance.

Proven Results

Vector EHS powers safer, more compliant operations across thousands of worksites helping customers achieve measurable results, including:

- **78% reduction** in employee injuries within five years
- **57% decrease** in average annual workers' compensation payouts
- Incident investigations reduced from **18 days to 4 days**

Organizations that partner with Vector demonstrate **30% stronger safety performance**, with lower incident rates and measurable improvements in operational reliability and workforce productivity.

Benefits

Improve the Efficiency and Visibility

- Save time with pre-built dashboards, forms, and templates that streamline data collection and reporting.
- Integrate seamlessly with HR, payroll, and other enterprise systems to eliminate redundant data entry and provide real-time visibility into safety performance across every site.

Streamline Compliance & Reporting

- Automate OSHA recordkeeping and access digital compliance logs instantly.
- Reduce the risk of fines and penalties with accurate, audit-ready documentation that keeps teams inspection-ready at all times.

Reduce Incident Costs

- Leverage real-time data to uncover risk patterns, prevent repeat incidents, and drive measurable improvement in safety outcomes.
- Vector EHS equips organizations with the insights needed to reduce incident costs and show leadership the tangible value of proactive safety management.

Ensure Consistency and Transparency

- Standardize safety processes across regions, departments, and worksites.
- Automated dashboards, notifications, and scheduled reports keep executives and EHS leaders aligned on safety goals and performance progress.
